

LA ASH PRODUCTS & SERVICES

CFB ASH SOLUTIONS

Characteristics

- Excellent for stabilization / solidification
- Excellent liquid sorption properties
- High Total CaO
- High demand for water of hydration
- Acid neutralization capabilities
- Sorption and reactivity enhanced by fineness and surface area
- TCLP metal concentrations are well below limits

Applications

- Hazardous and Non-Hazardous waste stabilization and solidification
- Landfill cover
- pH adjustment
- Waste neutralization / Pond closures
- Heavy metal waste treatment
- Road stabilization
- Stabilizing dredge spoils
- Stabilizing silty/sandy soils for road base in lieu of hauling soils off site
- Lower plasticity & increased strength

Do not mix OPF products with any other chemicals or byproducts, including but not limited to Cement Kiln Dust (CKD), Portland cement or lime, due to certain chemical reactions and/or swell potentials.
