Ernst & Young LLP (EY US) Names Eco Material Technologies CEO Grant Quasha as an Entrepreneur Of The Year® 2025 Mountain West Award Winner

Celebrating bold leaders shaping the future — Eco Material honored for advancing sustainable infrastructure and circular economy solutions across North America

South Jordan, Utah, July 15, 2025— Ernst & Young LLP (EY US) has named Grant Quasha, CEO of Eco Material Technologies ("Eco Material" or the "Company"), the leading producer, marketer and distributor of supplementary cementitious materials ("SCMs") and producer of green cement products in North America, as an Entrepreneur Of The Year® 2025 Mountain West Award winner. Now in its 40th year, the Entrepreneur Of The Year program celebrates bold leaders whose innovations revolutionize industries, disrupt markets and make a profound impact on communities.

The Mountain West program honors entrepreneurs from Alaska, Colorado, Idaho, Montana, Oregon, Utah, Washington and Wyoming. An independent panel of judges selected Quasha for his entrepreneurial spirit, purpose-driven leadership and lasting impact, building long-term value in the infrastructure and sustainability sectors.

"Leading Eco Materials through this period of rapid growth and innovation has been one of the greatest privileges of my career," said Grant Quasha, CEO of Eco Material Technologies. "Our mission is to make infrastructure more sustainable. Since 2000, Eco Material has supplied approximately 200 million tons of supplementary cementitious materials across North America, helping avoid more than 200 million tons of CO_2 emissions — comparable to the annual emissions of entire countries like Spain or Thailand. This recognition from EY is a testament to the work of our team and the real-world impact we're making for customers, communities and the planet."

Under Quasha's leadership, Eco Material has become a leading provider of sustainable cement alternatives and circular economy solutions that reduce environmental impact while enhancing infrastructure performance. In 2023 alone, the Company displaced approximately 5% of total U.S. cement use, while diverting over 10 million tons of waste materials from landfills and avoiding 5 million tons of CO_2 — equivalent to powering approximately 769,000 homes for one year.

The company is rapidly expanding, including the recent opening of a terminal in Queens, New York, supplying 50,000 tons of fly ash annually to the New York City metro market. With the Lakeview (Oregon) Green Cement Plant coming online this year, Eco Material is on track to deliver over 10 million tons of environmentally beneficial materials annually across North America, supporting critical projects that advance decarbonization and infrastructure resilience.

As previous Mountain West award winners are from companies including Expedia, Starbucks, Zillow, Quasha advances to the national Entrepreneur Of The Year® competition at the

Strategic Growth Forum®, one of the nation's most prestigious gatherings of high-growth, market-leading companies, held this November.

About Eco Material Technologies
Eco Material is the leading producer, marketer and distributor of ash-based SCM products in North America. Eco Material is also the leading environmentally focused, near-zero carbon cement producer in the United States. SCMs are the most impactful, environmentally friendly alternative materials to portland cement that significantly reduce the CO2 footprint and improve the performance and longevity of cement's end-product, concrete. Coal ash and volcanic ash are used to replace a portion of highly polluting portland cement in concrete and can be further upgraded to its higher performance Green Cement products by the Company. Eco Material also supplies services to electric utilities related to management of coal ash and other coal combustion products and recycles over 10 million tons per year of material into beneficial use - reducing emissions and avoiding landfilling of material.

About Entrepreneur Of The Year®
Founded in 1986, Entrepreneur Of The Year has celebrated more than 11,000 ambitious visionaries leading successful, dynamic businesses in the US, with the program now spanning nearly 60 countries globally. The US program includes 17 regional competitions where independent panels of judges select winners each June. Regional winners advance to compete for national recognition, with the overall US winner representing the country at the EY World Entrepreneur Of The Year™ competition.
